Did someone say CORVID? We bird nerds at Houston Audubon keep hearing Corvid - and we immediately think birds - so we thought we would make a fun and educational crossword puzzle for those stuck at home.

The United States has 19 Corvid species. Members of the Corvid family include jays, crows, ravens, and magpies. See if you know all of them!

Stumped? Visit the Corvidae section of allaboutbirds.org for help (as a last resort!)

Use common names; no spaces or punctuation.
