eBird to iNaturalist for the City Nature Challenge

Houston Audubon

Co-Coordinator for Team Houston-Galveston 2023 iNaturalist City Nature Challenge

Make a Bird Checklist

- Go birding! If possible, record sounds and take photos! If you are new to birding, be sure to make a list of the species you have seen, complete with your location and the date/time.
- Create and submit a checklist on your phone or from your desktop computer in eBird.

Download your Checklist

View your submitted eBird checklist on your desktop computer, select the pull-down list Checklist Tools and click on Download. This will download a .CSV file with your checklist information.

Format your Checklist for iNaturalist

Open the .CSV file and view it in Excel (or similar). Some columns will need to be moved/renamed/deleted to match the format needed to upload it into iNaturalist

Use these column names and formats:

- Taxon name: text
- Observation date: YYYY-MM-DD HH:MM
- Description: text
- Place name: text
- Latitude / y coord / northing: dd.dddd
- Longitude / x coord / easting: dd.dddd
- Tags: tag,tag,tag
- Geoprivacy: Leave blank for public, or entire "Private" or "Obscured"

Upload CSV to iNaturalist

Open iNaturalist from your desktop computer and click the green Upload button. Select More Import Options and click CSV. Click Choose File, find the .CSV you just saved, and select the blue Upload button.

iNaturalist	amberleung+	ÍNaturalist Search 🕲 Explore Your Observations Community More V 🧿 🕿 3 🗩 0
+ Add - X Remove X Combine 🕲 Duplicate		Import Observations Add: Single observation - Batch - From list - From photos
Drag & drop some photos or sounds or Choose files (8)		Got your data somewhere else? We can help. Import from other photos sites Import from SSV Upload a CSV file with observation data. If you have your data in a spreadsheet or database, this is probably the way to go. Upload CSV file Choose File No file chosen Add to Project None Upload View
More Import Options - From Flickr, Facebook, etc. From Soundcloud CSV Old observation form (deprecated)		Rules & Formatting 1. You must have a header row 2. Taxen name must match an existing taxon in our database 3. Only files with focer than 10000 rows, please 4. Use well-formed CSV. This means text with commas must be enclosed with double-guotes. Most spreadsheet applications should export CSV in this format. 5. Don't use double quotes anywhere else 6. Use unique file names for spreadstrue uploads 7. The geopervacy column must be in English and must be blank or have a value of "obscured" or "private" 8. We can only understand CSV in the following format:

Edit your Observations in iNaturalist

- You can now go to Edit Observations and find all the species from your checklist entered as separate observations.
- You can make changes or add photos or sounds to them easily by selecting Batch Edit and checking each observation before clicking Edit Selected.

Making Easy Batch Edits

Edit each observation individually, add photos, notes, or sounds.

Select Batch Operations at the top to make changes to all of them at once. This is helpful if you need to select the location from the map and apply it to all of them.

When you are finished editing and uploading any media, select the blue Save All button at the bottom.

Completed Observations Now in iNat

Your observations should now be complete with locations, dates, and times!

If there is a photo or sound, they are verifiable and can become Research Grade, otherwise they will remain Casual Grade.
