House Finch												
American Goldfinch												
PASSERIDAE												
House Sparrow												

Commissioner Steve Radack welcomes you to Paul Rushing Park. The park has restrooms and drinking fountains in the adjacent ball field club houses available to park visitors.

Chain-of-Lakes is a storm-water enhancement project in the heart of the Katy Prairie maintained for wildlife and its viewing by Harris County Precinct 3. The habitat is a series of interconnected lakes of varying depth. Some are suitable for diving ducks while others provide habitat for dabblers and waders. Summer draw-down provides abundant shorebird habitat in two of the lakes. There are two miles of trails in this 100-plus acre area with a quarter mile of boardwalk and six observation blinds.

Summer birds include Black-bellied Whistling-ducks, Mottled Ducks and Black-necked Stilts. Fall is good for shorebirds and returning waterfowl, hawks, pipits and sparrows. Winter provides opportunities for waterfowl, Sprague's Pipits, LeConte's and Grasshopper Sparrows as well as Bald Eagles and Crested Caracaras. Horned Larks are year-round residents and Long-billed Curlews are present in most months except June. The open cricket field and other open ball field areas on the north side of the lakes are good places to find American Golden Plovers and Upland Sandpipers in spring.

The information for this checklist is gleaned from Cornell University's eBird database. As of August 2011, the park had recorded 202 species of birds.

*Checklist reflects eBird data through 08/03/11
